EXPERIMENT 10

NAME : DURAIMADHAN M M **ROLL NO: 240701131**

Create a data visualization (e.g., pie charts, bar graphs) for an inventory management system using javascript

AIM

The aim is to create data visualizations such as pie charts and bar graphs for an inventory management system using JavaScript.

PROCEDURE

Step 1: Set Up Your HTML File

```
<!DOCTYPE html>
<html lang="en">
<head>
   <meta charset="UTF-8">
   <title>Inventory Management System</title>
   <script src="https://cdn.jsdelivr.net/npm/chart.js"></script>
</head>
<body>

<h2>Inventory Management System</h2>

<canvas id="pieChart" width="400" height="400"></canvas>
<canvas id="barChart" width="400" height="400"></canvas>

<script src="script.js"></script>

</body>
</html>
```

Step 2: Create the JavaScript File for Charts

```
// Inventory Data
const inventoryData = {
    labels: ['Electronics', 'Clothing', 'Home Appliances', 'Books', 'Toys'],
    datasets: [{
        label: 'Items in Stock',
        data: [200, 150, 100, 80, 50],
        backgroundColor: [
            '#FF6384',
            '#36A2EB',
            '#FFCE56',
            '#4BC0C0',
            '#9966FF'
        ]
    }]
};

// PIE CHART
const ctxPie = document.getElementById('pieChart').getContext('2d');
new Chart(ctxPie, {
    type: 'pie',
    data: inventoryData,
    options: {
        responsive: true,
        plugins: {
            title: {
                display: true,
                text: 'Inventory Distribution'
```

```
            }
        }
    }
});

// BAR CHART
const ctxBar = document.getElementById('barChart').getContext('2d');
new Chart(ctxBar, {
    type: 'bar',
    data: inventoryData,
    options: {
        responsive: true,
        plugins: {
            title: {
                display: true,
                text: 'Items in Stock by Category'
            }
        },
        scales: {
            y: {
                beginAtZero: true
            }
        }
    }
});
```
